1 Tutorial Name

Drone test flight 1

2 Hardware Requirement

Assembled Drone RC remote control FULL charged Battery

Figure 1: Done ready to fly

3 Theory and Description

before fly, always pay attention to safety. go in open ground. stay away when you trying to arm it.

<https://youtu.be/oRvV-g8zlzI>

we got crash in very first flight. later on we find out that , when try to give it forward motion it will actually move backward. so always check your parameters before fly. change RC2 parameter to -1. default RC2 parameter is 1.
